

# VINI BERTOJA

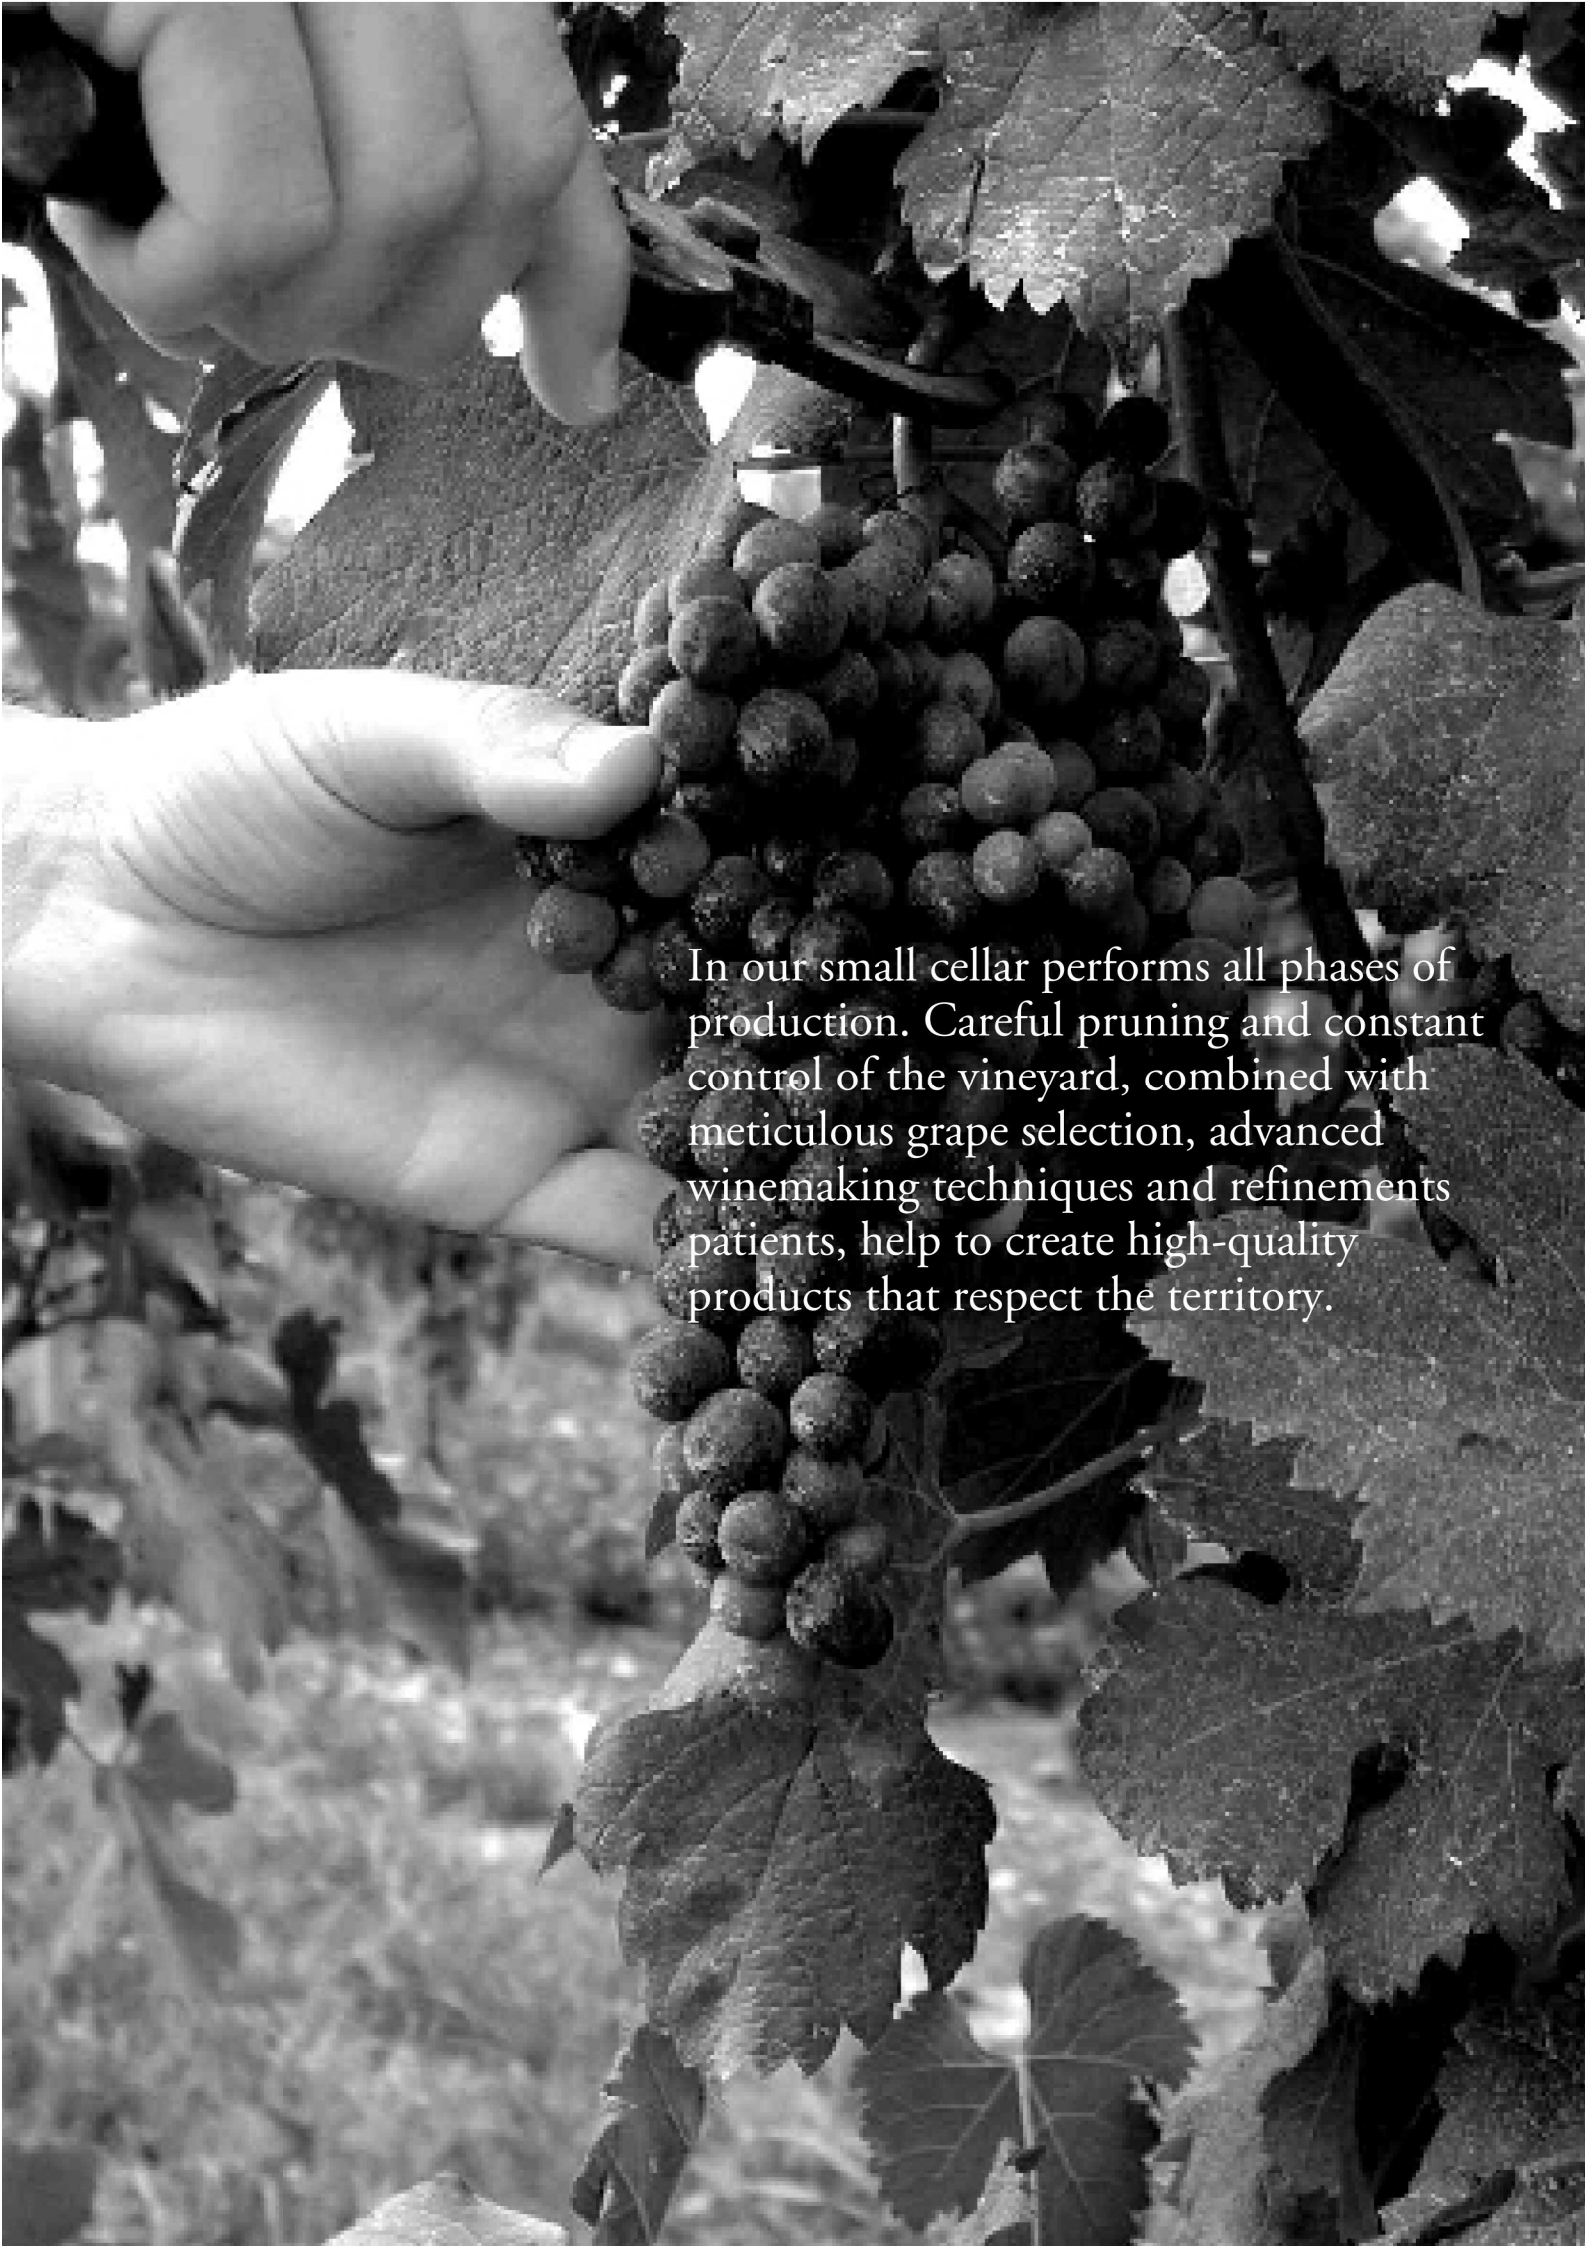

The Bertoja winery was founded in 2003 and is located in the plain of the Tagliamento right inside of the DOC Friuli Grave area, in San Lorenzo d'Arzene (Pn).

We dedicate ourselves with care and passion for the cultivation and transformation of grapes, with full respect for the environment and the fruit, knowing that the highest quality of a product to be sought at all stages of production, from the vineyard to the cellar.

In our small cellar performs all phases of production. Careful pruning and constant control of the vineyard, combined with meticulous grape selection, advanced winemaking techniques and refinements patients, help to create high-quality products that respect the territory.

Each wine reveals its origins and every wine is the most faithful expression of the territory that produces it. That's why our products are not "built" to satisfy a taste but arise spontaneously to identify a vine, a climate, a land dedicated to grapes and wine.

That's why our wines are identified with the "cru" that is the name in the Friulian language, the single vineyard which produced the grapes: Maseràtis, Bràida and Cjasâl.
